

Hind Limbs — In man each leg is composed of the *femur* (thigh bone), *Patella* (knee cap), *tibia* and *fibula* (shin and calf bones), 7 *tarsal* bones (heel), 5 *metatarsals* (sole of foot), and 5 *digits* composed of 14 *phalanges*.

In the pig the bones are similar to those of man. The primary difference is again in the number of digits. The pig has only 4 digits each with 3 phalanges.

HUMAN SKELETON
